

Environmental Policy

Policy Statement

Approved Roofing NE Ltd is committed to conducting all aspects of our roofing business in a manner that protects the environment. We recognise the environmental impacts that roofing and construction services can have, and we aim to minimise these impacts through sustainable practices, responsible sourcing, and continual improvement.

We are dedicated to complying with all relevant environmental legislation and industry standards and to implementing proactive measures that support environmental protection and climate resilience across all projects in London and throughout the UK.

1. Environmental Objectives

Our key environmental goals include:

- Reducing waste and promoting the reuse and recycling of materials.
- Minimising pollution, noise, and dust during roofing activities.
- Conserving energy and water resources.
- Sourcing materials from environmentally responsible suppliers.
- Using eco-friendly products and technologies where practical.
- Complying with and exceeding environmental regulations and guidance.
- Encouraging environmental awareness among staff, clients, and subcontractors.

2. Waste Management

We are committed to responsible waste practices across all projects:

- Minimising waste generation through accurate measurements and planning.
- Recycling roof tiles, slates, timber, and other materials where possible.
- Segregating and disposing of waste using licensed carriers and facilities.

- Documenting waste streams in line with duty of care obligations.
-

3. Resource and Energy Efficiency

We actively seek to reduce our consumption of natural resources:

- Using energy-efficient tools, lighting, and vehicles where applicable.
 - Promoting route planning and vehicle maintenance to reduce emissions.
 - Limiting water usage on-site by employing best practices.
 - Opting for materials with low environmental impact and high durability.
-

4. Pollution Prevention

Approved Roofing takes practical steps to prevent pollution and contamination:

- Preventing material and chemical runoff into storm drains or watercourses.
 - Storing fuels, adhesives, and other chemicals securely.
 - Regularly maintaining equipment to prevent oil or fuel leaks.
 - Implementing spill response plans on all job sites.
-

5. Sustainable Procurement

We aim to work with suppliers and partners that support environmental responsibility:

- Selecting sustainably sourced, recycled, or low-impact materials.
- Reducing packaging and favouring bulk delivery options where appropriate.

- Reviewing supplier sustainability credentials during procurement.
-

6. Biodiversity and Local Impact

We consider the local ecosystem and community in our project planning:

- Avoiding harm to trees, nesting birds, and natural habitats.
 - Scheduling noisy or disruptive works considerately.
 - Respecting heritage assets and environmentally sensitive locations.
-

7. Training and Engagement

We ensure that all staff and contractors understand our environmental commitments:

- Delivering environmental awareness training to all operatives.
 - Including environmental procedures in site inductions.
 - Promoting a culture of environmental responsibility across the company.
-

8. Monitoring and Continuous Improvement

We continually monitor and improve our environmental performance:

- Setting and reviewing environmental KPIs annually.
 - Conducting audits and assessments of site environmental controls.
 - Updating our policy in line with legislation, best practices, and innovations.
-

9. Policy Review

This Environmental Policy is reviewed annually by senior management to ensure relevance, effectiveness, and compliance with legal and business requirements.
